

# CAREER SERVICES

---

Career Services helps students with career planning, goal setting and job seeking strategies to prepare them for the workforce. Students can schedule an appointment with a Career Advisor for choosing a major that aligns to their academic pathway, exploring careers, writing or editing their resume and/or cover letter, learning new strategies to search for jobs, or preparing for an interview. Support is also available to connect students with employers, find work-based experiences that connect to their major, attend career fairs and events, or match to jobs and internships based on their skills and interests using Maricopa Pipeline AZ, MCCC's integrated virtual platform.
